

**COMMUNICABLE DISEASE FACT SHEETS
HOW AND WHEN TO USE**

The fact sheets labeled SCHOOL/CHILDCARE are intended to provide child care directors, school staff including teachers and nurses, health consultants, and other child care providers with background information about the conditions/diseases, exclusion criteria, and methods for treatment, prevention, and control.

Many of the diseases have Fact Sheets. Disease Fact Sheets provide basic information, and may be especially useful for communicating disease information to children’s parents and guardians. You may copy, post, and distribute those fact sheets unless the disease is REPORTABLE – do not post or distribute any fact sheet for reportable diseases without permission from the local or state health department. For a list of reportable diseases see Section 4 or visit our website at <http://cchealth.org/cd/disease-list.php>

If you have questions, contact Contra Costa Public Health Communicable Disease Programs at 925-313-6740 and visit our website at <http://cchealth.org/cd/>
